

**World Class Training advises the following as a precautionary measure.**

**Please follow the below links for Government advise.**

- Request all attendees read and sign a disclaimer prior to attending a WCT Course. This could be downloaded at time of booking and returned via email to WCT office prior to attending.
- Make provision for all attendees to read Gov. Website advise on Coronavirus (COVID-19)
- Any person who displays signs and symptoms of Coronavirus cannot part take in any World Class Training course.
- Said affected person can be transferred onto a course of their choice later in the year.
- Anyone suspecting they maybe a carrier of Coronavirus can transfer to another course of their choice later in the year.
- We would advise anyone returning from highly infected areas to wait for a minimum of 2 weeks prior to attending a course.

**Use of Equipment**

*We understand that candidates need to demonstrate the full protocol of CPR- that includes breaths for course qualification observation. Following guidelines we therefore recommend thus so..*

- Issue each attendee with a face shield to practice Mouth-Mouth (for use on the manikin)
- After each attendee has touched Resus Annie the manikin must be wiped over with an alcohol based wipe.
- Failing using the above use of Dettol spray – check on info label it will kill Coronavirus (but questionable about the COVID-19 strain)
- Please check your wipes are in date.
- Request all attendees wash hands prior to practicing CPR on Manikin – this could be incorporated during a cross infection hand washing session – we would suggest increased comfort breaks in order to wash hand more frequently.
- We would highly recommend each trainer performs a deep clean on each manikin following a course – including lung changes.
- Please have available hand sanitizer for candidates (and trainers) use. Although we know anti bacterial gels/sanitizers will not work effectively on the Coronavirus (COVID -19)
